

Tusk Pannier Box Hardware

Thanks for purchasing this quality Tusk Product. The Tusk pannier boxes are a great luggage component for your dual sport motorcycle. With proper care and inspection, these panniers are sure to last through your many adventures.

NOTE - Before using the boxes, you must check all fasteners to make sure they are tight.

1. On top of the box there are 4 bolt-on footman loops. Make sure these are tight. It is recommended to remove the footman loops and apply a low strength thread locker to the bolts. Using a Philips screw driver and a 7mm wrench or socket to tighten.

2. The locks come pre-assembled; make certain the big Philips screw on the opposite side of the key is tightened. Also, tighten the large nut threaded onto the lock cylinder. Again, low-strength thread locker is a good idea.

Note: *It is recommended to go through and check fasteners regularly to make sure everything stays tight.*
