<div style="writing-mode: vertical">INSTALLATION AND PRODUCT INFORMATION</div>

Hardware:

1– Skid Plate
2– Mount Brackets (Top and Bottom)
1– Rear Mount Bracket
8– M6 x 1.0 x 20MM Countersunk Allen Bolt
4– Cup Washer
4– M6 x 1.0 x 20MM Flange bolt (8mm head)
1– Thread locker

8– M6 x 1.0 x 20mm Countersunk Allen bolt

4 – M6 x 1.0 x 20mm Flange Bolt (8mm Head)

4 – Cup Washer

1– Thread Locker

2– Top Mount Bracket

2– Bottom Mount Bracket

1–Rear Mount Bracket

1– Skid Plate

1. Using the **4-M6 x 1.0 x 20mm Countersunk Allen Bolts** & **Thread Locker**, tightly install the **Rear Mount Bracket** onto the **Skid Plate** with the open end facing the linkage guard. **Fig. 1**

2. Insert the **2– Mount Brackets (Top and Bottom)** into the frame of the bike using the **8– M6 x 1.0 x 20mm Countersunk Allen Bolt**, leaving the clamps loose enough for proper alignment. Place one forward of the front motor mount (approximately 1"), and one behind (approximately 1.25"). **Fig. 2**

3. Put the **Skid Plate** onto the bike by sliding the front tab just below the exhaust port and the frame. Then push the **Rear Mount Bracket** onto the cross brace below the foot pegs.

4. Check both the **Skid Plate** and the **Mounting Bracket** holes for proper alignment. Make adjustments as needed to the positioning of the **Mounting Brackets** until all four holes are aligned. **Fig. 4**

5. Once the brackets are properly aligned remove the **Skid Plate** and fully tighten the **Mounting Brackets.**

6. Using **Thread Locker**, tighten the **Skid Plate** to the frame of the bike using the **4– M6 x 1.0 x 20mm Flange bolts (8mm head)** with the **4– Cup Washer. Fig 5,6**
